PHILLIP HENGEMUHLE
SOFTWARE ENGINEER

» Web Dev Projects

Portfolio Site
Portfolio site built with HTML/CSS and JavaScript within the first few weeks of the immersive program.

Troll Wars
Built by my team in 4 days utilizing a front-end framework that we had never used, as well as a new non-trivial library (GraphQL). This game is a expanded version of chess, adding in attack values as well and defense to increase the difficulty of the game.

Movie Database
Front end built in React with Router, and the back end is built with PostgreSQL and Knex. Full CRUD functionality with custom api, built from scratch.

» Selected Experience

American Produce
Commodity Buyer
Denver, CO
